Week	Phase	Focus	Key Work	Expected Outcome
W1	**Phase 1 — Single Modality**	**Activity vs Gesture**	Establish the single-person WiFi-CSI Activity–Gesture classification problem and complete the required data collection	Initial Activity vs Gesture dataset
W2		**Fine-grained Activity & Gesture Classes**	Expand the broad classes into meaningful sub-classes within Activity and Gesture	Fine-grained classification dataset
W3		**Model Development**	Develop and train models for Activity/Gesture and their individual sub-classes	Initial classification models and results
W4		**Evaluation & Analysis**	Compare models, analyze errors and confusion between classes, and identify the strengths and limitations of WiFi CSI	**Complete single-modality baseline**
W5	**Phase 2 — Multimodality**	**Wearable Modality**	Introduce the wearable sensor as a second sensing modality and establish its data acquisition pipeline	Wearable-based dataset and pipeline
W6		**Multimodal Dataset**	Synchronize and prepare WiFi CSI and wearable data for the same activities and gestures	Aligned multimodal dataset
W7		**Multimodal Model**	Develop models using WiFi CSI + wearable information	Initial multimodal classification results
W8		**Single vs Multimodal Analysis**	Evaluate the multimodal approach against the individual modalities and analyze the improvement	**Validated multimodal approach**
W9	**Phase 3 — Fusion & Generalization**	**Fusion Strategy**	Develop and evaluate the fusion of WiFi CSI and wearable representations	Effective multimodal fusion model
W10		**Multi-Person Extension**	Extend the experimental setup from a single person to multiple people	Multi-person multimodal dataset
W11		**Generalization & Robustness**	Evaluate performance across different people and analyze generalization, class confusion and failure cases	Robust multi-person results

Week	Phase	Focus	Key Work	Expected Outcome
W12		**Final Integration & Analysis**	Consolidate the strongest models, fusion strategy and experimental findings into the complete system	**Final integrated research outcome**
